

ICCAE 2nd Open Seminar in AY2016

& 第57回名大祭研究公開セミナー

2016. **6.5** (SUN) **11:00 – 12:30**

名古屋大学IB電子情報館011講義室

Lecture Room No.011, IB Building (Integrated Building), Nagoya University

開発途上国の農村における課題解決を目指した実践的研究 —カンボジアの米蒸留酒の品質向上—

An action research to solve rural issues in developing countries:
Quality improvement of rice liquor in Cambodia

浜野充 Dr. HAMANO, Mitsuru

副センター長／講師

(元名古屋大学農学国際教育協力研究センター 研究員)

Senior Assistant Professor / Vice Director,
International Center for Agricultural Education and Research,
Faculty of Agriculture, Shinshu University
(Former Research Fellow, ICCAE, Nagoya University)

Language : Japanese

開発途上国の農村開発に関する研究において、現状分析から導かれた提言に留まらず、地域で課題を抱える人々とその解決に向けた実践を繰り返し、課題解決を導く実践的研究の重要性が高まっている。後発開発途上国として位置づけられるカンボジアにおいて、農村で営まれる伝統的米蒸留酒造が薄利で赤字経営が多いという課題に焦点を当て、アクションリサーチ手法を取り入れて課題解決を導いてきた実践的研究を紹介する。

In the study of rural development in developing countries, the importance of action research has been increasing. It is a study method in which researchers and target people work together to solve existing issues in a society. The method consists of identification of problems and their factors, planning, acting, and evaluation of the project. This process continues until the identified problems are solved, and practical suggestions generated from the study cycle can be provided to the other areas. In Cambodia, one of the least developed countries in Southeast Asia, traditional rice liquor production faces a problem of low profitability and deficit operations. This seminar will focus on how we have solved the problems through an action research.
